

Import Data using Transform Maps (Spreadsheet)

Project Demonstration Phase

Overview

The Project Demonstration Phase provides a structured outline for presenting the micro project workflow, Coalesce functionality, and dashboard analytics to technical evaluators or stakeholders.

Demonstration Script & Presentation Sequence

1. System Setup & Architecture Introduction

- Present the business problem: importing bulk employee records from Excel into ServiceNow while maintaining data integrity.
- Show the target table structure (u_employee_test) and staging table (u_employee_import).

2. Transform Map & Coalesce Demonstration

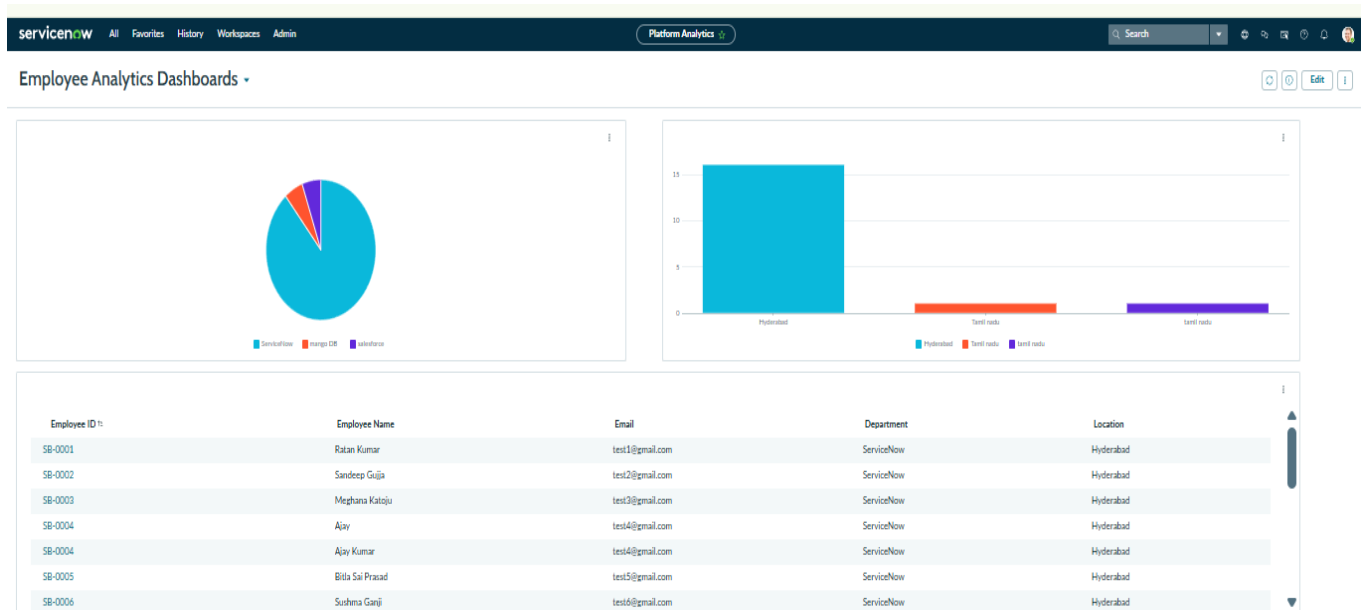

- Navigate to **System LDAP** → **Transform Maps** and open Sample Spreadsheet Import.
- Highlight the **Field Maps** tab and demonstrate Coalesce = True on Employee ID.
- Explain how Coalesce acts as a primary key to distinguish updates from new insertions.

3. Live Import Execution

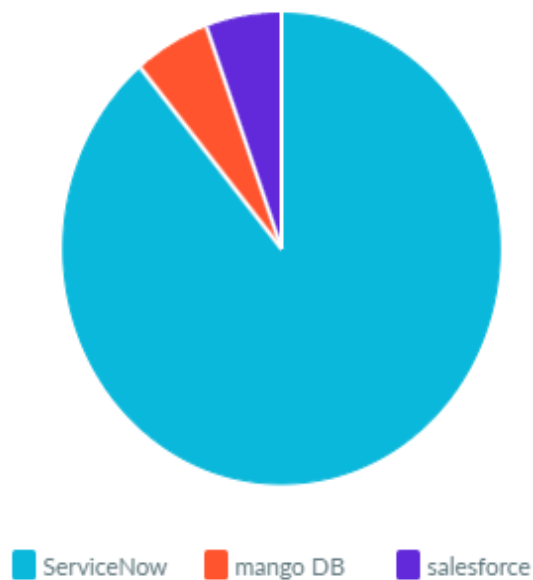

- Perform an import using a modified spreadsheet containing 2 updated records and 2 new records.
- Run the transformation and open **Transform History**.
- Point out the execution stats (**2 Inserted, 2 Updated**).
- Re-run the exact same file to demonstrate **4 Ignored** entries, proving duplicate prevention works.

4. Dashboard & Analytics Presentation

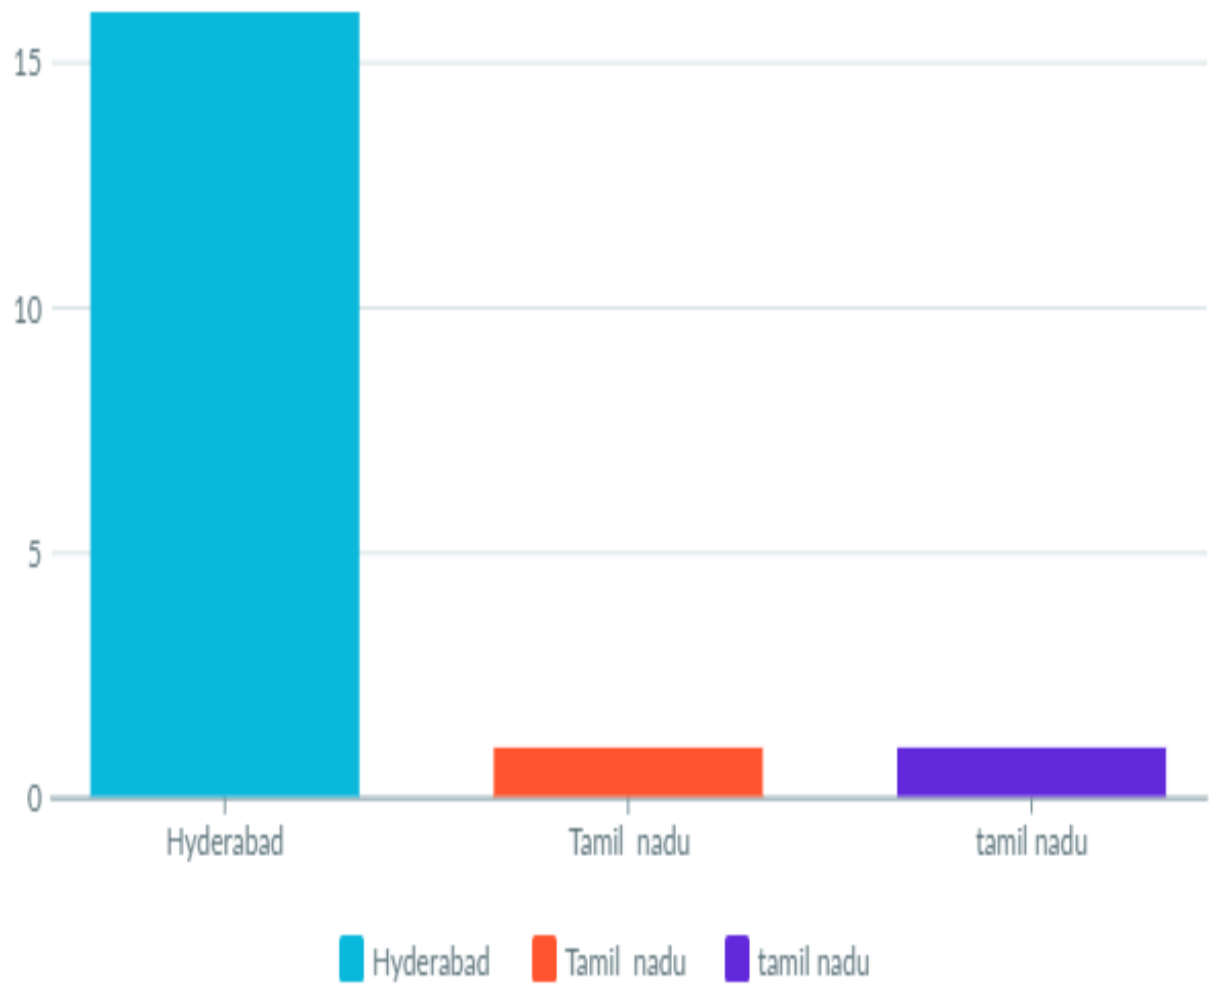

- Navigate to **Self-Service** → **Dashboards** and open **Employee Analytics Dashboards**.

- Present the three consolidated widgets:
- **Employees by Department (Pie Chart)**

- **Employees by Location (Bar Chart)**

○ Employee List Report (List View Widget)

Report Title: Employee Test List
Run Date and Time: 2026-09-24 22:12:21 Pacific Daylight Time
Run by: System Administrator
Table name: u_employee_test
Sort Order: Employee ID in ascending order

18 Employee Test s

Employee ID	Employee Name	Email	Department	Location
SB-0001	Ratan Kumar	test1@gmail.com	ServiceNow	Hyderabad
SB-0002	Sandeep Guja	test2@gmail.com	ServiceNow	Hyderabad
